PROFILE

Computer Science student specializing in backend development using ASP.NET Core, C#, and SQL Server. Experienced in building real-world web applications and RESTful APIs with a strong foundation in object-oriented programming, database design, and software engineering principles. Actively seeking an internship opportunity in .NET backend development to gain hands-on experience and contribute to scalable, high-performance systems.

PROFESSIONAL EXPERIENCE

Full Stack .NET Web Development Trainee

11/2025 – 07/2026

Digital Egypt Pioneers Initiative (DEPI)

- Completed intensive full stack .NET training with a strong focus on backend development
- Developed web applications using ASP.NET Core, Web API, and MVC architecture
- Designed and managed relational databases using SQL Server and Entity Framework
- Applied C# programming principles including OOP, LINQ, and dependency injection
- Collaborated on team projects using Git and GitHub for version control

Frontend Development Trainee

08/2025 – 08/2025

Information Technology Institute (ITI)

- Gained hands-on experience in frontend development fundamentals
- Built responsive web pages using HTML, CSS, and JavaScript
- Applied UI/UX best practices for clean and user-friendly interfaces

PROJECTS

Cyber Security Company 🔗

Website

Developed a modern cybersecurity website using HTML, CSS, and JavaScript, featuring smooth animations and an interactive UI, resulting in a **fully responsive layout supporting 5+ service sections** with clean futuristic design.

ELITE 🔗

Website

Designed and built a premium perfume e-commerce website using HTML, CSS, and JavaScript, incorporating elegant UI design and smooth animations, showcasing **10+ product displays** for a luxury shopping experience.

Travel Company 🔗

Website

Built a dynamic travel website using HTML, CSS, and JavaScript, showcasing **15+ destinations and tour packages** through engaging animations in a fully responsive layout.

Accounting Company 🔗

Website

Developed a professional accounting services website using HTML, CSS, and JavaScript, presenting **6+ core services** with a clean corporate design and fully responsive structure.

Choose your Own Car with US Now 🔗

Website

Designed and implemented a car browsing platform using HTML, CSS, and JavaScript, featuring **20+ car listings** with a professional UI and smooth animations for an intuitive user experience.

NeuroCore Admin Dashboard

Dashboard

Built a hospital admin dashboard using HTML, CSS, and JavaScript, managing **patients and appointments across 4+ departments** with interactive analytics and smooth UI transitions.

iStore Admin Dashboard

Dashboard

Developed an admin dashboard managing **50+ devices** across laptops, smartphones, and Apple products, incorporating dynamic charts and real-time product tracking with a fully responsive interface.

Prime Estate Admin Dashboard

Dashboard

Designed a real estate platform featuring **30+ property listings** with smooth animations and a modern responsive UI tailored for buyers and investors.

Buying Your Own Car (Team Project)

HTML, CSS, JavaScript

Collaborated in a team of **6 developers** to build a car browsing web application using HTML, CSS, and JavaScript, applying version control with Git and GitHub for organized team workflow.

IPC Chat System

C++

Engineered a real-time IPC chat system in C++ using sockets and shared memory, supporting **concurrent handling of 10+ clients** with multithreading and synchronization for reliable performance

Maze Solver

Python

Implemented a maze-solving application in Python using AI search algorithms, efficiently processing **1,000+ nodes** to determine optimal paths with fast and accurate solutions.

Color Guessing Game

Java (OOP Project)

Developed an object-oriented color guessing game in Java with **5+ difficulty levels**, applying core OOP principles including encapsulation and clean class design for a scalable architecture.

Online Shopping System (Java GUI)

Java

Built a desktop online shopping application using Java GUI, supporting **3+ products** with user interaction and core shopping features for an intuitive experience.

Spam Detection (NLP Project)

Python, NLP, Machine Learning

Developed a spam detection system using Python, NLP, and machine learning, achieving **92%+ classification accuracy** with a user-friendly GUI for real-time message prediction.

Rain Prediction using Dimension Reduction

Python, ML, KNN, SVM

Built a weather prediction model using Python with KNN and SVM algorithms, achieving **98%+ prediction accuracy** through SelectKBest feature selection and effective dimensionality reduction.

SKILLS

TECHNICAL SKILLS

- **Backend Development:** ASP.NET  Core, C#, Web API, REST API, Entity Framework, MVC, SQL Server, MySQL, SQL
- **Programming Languages:** C#, Python, Java, C++
- **Web Technologies:** HTML, CSS, JavaScript
- **Tools & Platforms:** Git, GitHub, Visual Studio, VS Code, NetBeans, IntelliJ, Packet Tracer
- **Networking & Security:** CCNA (Networking & Switching/Routing), Microsoft Security & Compliance (SC-900)
- **AI & Data:** Machine Learning, NLP, KNN, SVM, Numpy, Pandas, Scikit-learn

SOFT SKILLS

- Organization Skills
- Problem Solving
- Communication
- Teamwork
- Time Management

EDUCATION

Bachelor, Computers And Information Technology
Egyptian E-Learning University (EELU)
Very Good

09/2023 – 06/2027

LANGUAGES

English
B2

Arabic
Native

CERTIFICATES

CCNA
Introduction to Networks - Cisco
Networking Academy.

CCNA
Switching, Routing, and Wireless
Essebtials - Cisco Networking
Academy.

SC-900
Microsoft Security, Compliance,
and Identity Fundamentals
score:880 out of 1000.
